EDUCATION

Pune Vidhyarthi Griha's College of Engineering and Technology

Pune,India

Artificial Intelligence and Data Science Bachelor of Engineering(B.E)

September 2024 - June 2028

GPA: 9.32

SKILLS

Programming Languages: python, c, cuda, java, c
Libraries/Frameworks: tensorflow, keras, scikit-learn, pandas, numpy, matplotlib, seaborn, plotly, google-adk, pytorch, fastapi, flask, streamlit, huggingface
Tools / Platforms: Git, VS code, Pycharm, Docker Desktop, VMware
Databases: SQL, MongoDB

PROJECTS / OPEN-SOURCE

potato-disease-prediction | [Link](#)

Jupyter Notebook, Python, HTML, CSS, PureBasic

Built a CNN-based image classification system using TensorFlow/Keras to detect potato leaf diseases, achieving 98% training accuracy and 97.5% validation accuracy, with a Dockerized end-to-end ML pipeline designed to scale easily to other plant leaf diseases.

fleetSync | [Link](#)

Javascript ,html ,css, fastapi,pathway,docker,json,react,pytorch,pathway-llmapp

FleetSync is a web-based platform for real-time fleet monitoring and intelligent navigation. It uses an advanced pathway computation engine to optimize routes based on dynamic conditions like traffic and terrain. The system improves efficiency, reduces costs, and enables scalable, data-driven fleet operations.

EDIPULSE | [Link](#)

Javascript ,html ,css, fastapi,pathway,docker,json,react

An software for X12 files that help to reduce the time overhead by pointing error and explainable ai

GraphSentinel | [Link](#)

python , torch , numpy ,react , nodejs, torchmetrics , NetworkX

An money mule detection system with graph attention neural network at core trained on AML dataset by "IBM" with complete web application and api support for banks

Trashify- | [Link](#)

python , torch , numpy , huggingfaceapi , gradio , torchmetrics , transformers , datasets

And Object Detection Model () which is fine tuned on custom dataset () with gradio application hosted on huggingface and fine tuned model weights also on repo

FoodExpert | [Link](#)

torch , numpy , huggingfaceapi , gradio , torchmetrics , transformers , datasets

and fine tuned llm (gemma-3-270it) for getting structured prompt output with Supervised Fine Tune trainer(SFT) from Transformer Reinforcement Learning (trl)

CourseMateAi_rag | [Link](#)

langchain , python , streamlit , uv

and pdf rag application built with langchain and mistral used as LLM service provider with chroma as vectorstore and multiquery retriever for variations

HONORS & AWARDS

- Smart India Hackathon 2025 Finalist. , Here i had contributed in RAG (chatbot) for our application that has the big knowledge base of whole application
- Indian Institute Of Information Technology ,Pune hackathon "Nexus 2.0" Second Runner Up , Here we presented "Graph Sentinel" and money mule detector system and my work was on deep learning model "graph attention neural network"
- Second runner up at APCOER project expo where we presented "GraphSentinel"
- Runner up at AISSMS College of Engineering hackathon where we build "AgriSense" an complete web application for farmer with potato disease model implemented
